PRODUCT OVERVIEW

GPSina X1, Biz Package

The GPSina X1 Biz is a powerful GPS tracking solution tailored for business fleets, logistics companies, and commercial vehicle operators in Malaysia. Built for high performance and reliability, it combines advanced 4G GPS tracking with multi-network connectivity – seamlessly switching between Maxis, Celcom, and Digi to ensure uninterrupted nationwide coverage. Accessible via both a web dashboard and mobile app, X1 Biz offers a user-friendly interface for real-time monitoring and control of vehicle operations.

X1 Biz delivers a comprehensive set of features to enhance fleet visibility, safety, and efficiency. Users can review up to 360 days of trip history, monitor driving behaviour such as harsh braking or speeding, and receive geo-fence alerts when vehicles enter or exit designated areas. The system also includes advanced security tools such as remote paddle lock, vehicle immobilizer, crash detection alerts, and an SOS panic button for emergencies. For added oversight, it offers discreet audio monitoring through eavesdrop mode.

To support operational decision-making, the system provides real-time alerts for ignition events, trip activity, and geo-fence breaches. Automated PDF reports can be generated for trip records, ignition logs, and alerts—making compliance and review simple. With GPSina X1 Biz, fleet operators gain actionable insights to improve safety, reduce risks, and streamline fleet management with greater confidence and control.
